Appointments can be made online, visit our website: www.whitfordsmedical.com.au

● OTHER SERVICES

- 24 Hr blood pressure monitoring
- Travel vaccines & advice
- Chronic disease management
- Health Assessments for over 75s
- Health Assessments for 45- 49 y/o
- Anti-wrinkle injections/treatment
- Skin Cancer Check/Mole Scan
- Travel vaccines including Yellow fever
- Medicals
- Audiometry
- Diving medicals
- Family Planning
- ECG
- Minor surgery
- Wedge resections
- Implanon insertion & removal

Our aim is to give our patients the highest possible quality of care, by ensuring excellence in all aspects of our practice. We endeavour to provide patients with the best and most current treatments, methods, materials and equipment within our resource capabilities to ensure that the patients receive the high quality of service they have come to expect.

● ALLIED HEALTH PROFESSIONALS

Allied Health appointments available at reception:

- Podiatrist (Advanced Foot Surgery)
- Consultant Dietitian
- Occupational Therapy (Perth Injury & Pain Clinic)
- Diabetes Educator
- Psychologist

● BILLING ARRANGEMENTS

We are a bulk billing practice Monday to Friday. Medicare Card required.

Saturday is Private Billing. Payment is required on the day of consultation.

● APPOINTMENTS

Consultation is by appointment. Urgent cases are seen on the day.

Home Visits. If unable to attend our surgery, one of receptionist can arrange for a locum Doctor to visit you at home. (See after hours for phone number.)

Long Appointments. If booking for a medical or for a more complex problem or Pap smear, please inform reception.

Non-Cancellation Fee. If you fail to attend appointments a fee of **\$38.50** will apply. To avoid receiving a fee, adequate notice is required.

● SPECIAL PRACTICE NOTES

Molescan/Skin checks. Full skin cancer mole checks are available by appointment to ensure a qualified Molescan doctor is available. An appointment specifically is necessary for this service.

Contacting Doctors. Should you wish to speak to a Doctor, please be aware the he/she is likely to be consulting. A message can be left and your Doctor or staff member will return your call with a reply.

Reminder system. Because our practice is committed to preventive care, we may send you an occasional reminder regarding health services appropriate to your care. If you wish to opt out of this, please let us know.

COVID vaccination

There has of course been much media reporting about vaccination for Covid19.

There are a number of different vaccines being used around the world. No vaccine is approved for use until it has demonstrated both efficacy (that it works) and safety (that the side effects profile is acceptable). In Australia, the Therapeutic Goods Administration (TGA) must approve a medicine of any kind before it can be used or prescribed. Currently, two vaccines have been ordered by the Federal government, and the vaccination program has now started to roll out. There are many moving parts, so delays are always possible. It is hoped to have virtually all the population covered by the end of 2021 and maybe sooner.

The Federal government has called for

expressions of interest from general practices to be vaccine hubs. The process will be more complicated than with seasonal flu vaccination and will take longer due to extra documentation being needed and a requirement for monitoring for a time post-vaccination.

There will be stages of the rollout with quarantine and border workers, certain frontline healthcare workers and aged care staff and residents first in line.

Australia has done extraordinarily well by world standards, and so there is not the extreme urgency to start compared to, say, the UK or USA.

Clinics may choose to run dedicated vaccine clinics separate from regular appointments. Some practices may not choose to be involved, and there is no need for every clinic to do so in order to get the job done. Booking will be made centrally rather than via your clinic.

This is a fluid situation so ask your GP for guidance but also be aware that they may not have every answer and that the answers may change over time if new guidance comes in.

EDITORS NOTE: This information was current as at the time of print.

Medicinal Cannabis

In early February there was much media coverage of cannabidiol (CBD) being available over the counter at chemists.

It is true that the Therapeutic Goods Administration (TGA) last year down scheduled CBD to S3 which does allow sales at chemists without prescription for up to 30 capsules of 150mg each. However, there was a caveat. The only products which will have this classification are those on the Australian Register of Therapeutic Goods (ARTG) and presently there are none. To get on the register requires expensive trials of efficacy and other data.

However in the next 12 -24 months this will happen, and products will eventually appear on chemist shelves. CBD is one of two main cannabinoids found on medicinal cannabis. The other is tetrahydrocannabinol (THC) which is the component which is psychoactive. However its use in medicinal forms, combined with CBD, can be beneficial in chronic pain and other conditions.

To end 2020 there have been over 85,000 approvals granted to prescribe medicinal cannabis for Australian patients. This is mainly for chronic pain, multiple sclerosis, anxiety,

<https://www.tga.gov.au/medicinal-cannabis-information-consumers>

and cancer pain nausea and vomiting. It can only be prescribed when other treatments have failed to assist or caused unacceptable side effects. Different states have different approval systems. Not all doctors are familiar

with its use as, yet. It is not for everyone and some claims about its benefit are without basis. However, medicinal cannabis has a legitimate role in certain people in certain circumstances.

Pet infections

Australians have one of the highest pet ownership rates in the world. Pets provide much joy and there are many health benefits associated with pet ownership including better mental health and lower rates of high blood pressure and heart disease (especially in dog owners).

However, pets can also be a source of infections.

This mainly happens if you are bitten or scratched by a pet. Dog bites can easily be infected, so if bitten, see your GP. These are commonest in young boys and more often from pets rather than stray dogs. Cat bites are commonest in older women and most often on the hand.

Superficial wounds can be managed with cleaning and local antiseptic. Deeper or larger wounds may need a course of antibiotics.

In rare cases, if the tendon or muscles are involved, then referral to a hospital

may be needed. Other infections that may be transmitted by pets are worms. This affects children most often and is generally easily treated with worm medicine from the chemist. Fungal skin infections such as ringworm can also be caught from pets. This can be treated with an antifungal cream.

After you have handled a pet, make sure you wash your hands. This minimizes the chances of getting an infection.

For most people having a pet in their lives and their families lives far outweighs any of the above and play a very important role in society.

Avoid Listeria in pregnancy

Listeria is an infection caused by a common bacterium. It occurs in the soil and water. Thus, plants and marine life can be infected as well as animals which eat plants with the bacteria.

There are around 65 cases in Australia each year, and 10% of these are in pregnant women who are at greatest risk in the third trimester.

Listeriosis increases the risk of stillbirth, low birth weight and premature labour. Symptoms can be mild or severe, with fever, headaches, vomiting and diarrhoea.

Whilst uncommon, it is important to take steps to avoid potential exposure to Listeria. Fortunately, this is not difficult and involves not eating "high risk" foods whilst pregnant. Foods to avoid are processed deli poultry meats (e.g. sliced chicken), soft cheeses (brie camembert), raw seafood (e.g. oysters), pre-made sushi,

unpasteurised juices, and soft-serve ice creams. There are plenty of foods that you can continue to enjoy whilst pregnant, including hard cheeses, smoked seafood's, hard frozen ice cream or gelato, freshly prepared sushi, pasteurised juices and hot deli meats (cooked at over 75°C).

When pregnant, it is important to maintain a balanced diet, and you may need certain supplements. Talk to your GP about any concerns you have and also about both diet and the need (if any) for supplements.

Avoiding Listeria is not difficult, and there is no need to stress over every mouthful of food you eat.

Shin Splints

Shin splints are a common condition seen in runners and those who play sports involving running and rapid acceleration.

The exact cause is unknown but is thought to be due to repeated stress on the shinbone, and it's attaching connective tissue. It is more common in females and those with a previous leg injury and also more likely in those often running on hard or uneven surfaces.

The typical symptom is pain in the shin with running. There may be associated swelling. At first, the pain is when one starts running and eases after warm-up.

<https://www.betterhealth.vic.gov.au/health/conditionsandtreatments/shin-splint>

As the condition advances, pain persists for longer and can even continue after ceasing exercise.

Diagnosis is based mainly on the history. There is no diagnostic test. X-rays (or

rarely an MRI scan) may be done to rule out other causes such as a stress fracture.

There is no specific treatment. Ice packs and simple painkillers provide symptom relief in the short term. Rest and avoiding activity, which worsens the pain, is key. However, you don't need to stop all exercise. Swimming or walking in water are two options to maintain fitness.

Attention to training techniques is helpful in some cases. Use of orthotics or insoles may also help, as can change of shoes. For the more serious athlete, having a biomechanical assessment of their running style may lead to technique changes, which are beneficial.

Whitfords Avenue Medical Centre

● SPECIAL PRACTICE NOTES

Test results. Please ensure you make a follow-up appointment with your doctor, as results are not given over the phone.

Despite our best intentions, we sometimes run late! This is because someone has needed unexpected urgent attention. Thank you for your consideration.

Medical record confidentiality. This practice protects your personal health information to ensure it is only available to authorised staff members for the intended purposes and to comply with the Privacy Act. **A copy of our practice privacy policy can be located at reception.**

Your comments on our medical services are always welcome. We strive to improve for your benefit. Please direct any queries or complaints to the practice Manager. Feedback forms are available at reception, or email: jmarkouloop@iinet.net.au. Unresolved issues can be addressed to Health & Disability Services Complaints Office: www.hadsco.wa.gov.au Ph: **6551 7600**

Molescan/Skin checks. Full skin cancer mole checks are available by appointment to ensure a qualified Molescan doctor is available. An appointment specifically is necessary for this service.

Implanon insertion. Can be done in our minor theatre room after assessment by a family doctor at this practice.

Cosmetic treatment. Cosmetic treatment is available at the Whitfords Avenue Medical Group. For more information about the service available please visit our Whitford's Cosmetic Medicine website.

ANZAC BISCUITS

Ingredients

- 1 1/4 cups plain flour, sifted
- 1 cup rolled oats
- 1/2 cup caster sugar
- 3/4 cup Desiccated Coconut
- 150g unsalted butter, chopped
- 2 tablespoons golden syrup or treacle
- 1 1/2 tablespoons water
- 1/2 teaspoon Bicarbonate Soda

Method

1. Preheat oven to 170C. Place the flour, oats, sugar and coconut in a large bowl and stir to combine.
2. In a small saucepan place the golden syrup and butter and stir over low heat until the butter has fully melted. Mix the bicarb soda with 1 1/2 tablespoons water and add to the golden syrup mixture. It will bubble whilst you are stirring together so remove from the heat.
3. Pour into the dry ingredients and mix together until fully combined. Roll tablespoonfuls of mixture into balls and place on baking trays lined with non stick baking paper, pressing down on the tops to flatten slightly.
4. Bake for 12 minutes or until golden brown.
